

智慧交通 解决方案

INTELLIGENT TRANSPORTATION SOLUTIONS

(大运量轨道交通、中运量轨道交通、电子轨道 IERT 精准驾驶系统等)

(LARGE VOLUME RAIL TRANSIT, MEDIUM VOLUME RAIL TRANSIT, ELECTRONIC TRACK IERT PRECISE DRIVING SYSTEM, ETC.)

在智慧交通领域，上海电气拥有城市轨道交通车辆、通信信号、综合监控、屏蔽门、供电、电梯、环控和给排水等机电设备和系统的设计、制造和系统集成能力，业务覆盖地铁（轻轨）、有轨电车、市域铁路等多种制式。同时，为适应城市公交优先和全网络提速需求，上海电气拥有电子轨道系统和智慧公交整体解决方案，为各城市规划 and 量身定制最合适的综合交通优化方案。

In the intelligent transportation field, Shanghai Electric is capable of design, manufacturing and system integration of electromechanical equipment and systems such as urban rail transit vehicles, communication signals, integrated monitoring, shielding doors, power supply, elevators, environmental control, water supply and drainage, etc., and its business covers various systems such as subway (light rail), tram car and municipal railway. At the same time, in order to adapt to the demands of urban bus priority and full network acceleration, Shanghai Electric has an overall solution of electronic track system and smart bus, so as to provide the customized most appropriate comprehensive traffic optimization scheme for each city
